Severity/Importance:	1-Critical
Error Type:	Functional

#### Description

##### Steps to reproduce:

1. Open Kimba 2 application.
2. Open an folder with picture where more than 15mb size picture is available.
3. Click on file module and select folder option.
4. Select a picture with more than 15 mb in main window.
5. Try to edit by performing any function like rotate, flip.
6. Pay attention to the result.

**Actual result:** An 'unhandled expectation' error message is displayed when more than 15 MB of picture is trying to be edited by any function (rotate, flip) performed. Please see [Windows11\\_64 bit\\_2.0\\_Bug\\_50.mp4](#)

**Expected result:** An 'unhandled expectation' error message should not be displayed when more than 15 MB of picture is trying to be edited by any function (rotate, flip) performed.

Attachments:	Windows11_64 bit_2.0_Bug_13_Requirement.png  Windows11_64 bit_2.0_Bug_13.mp4  Windows11_64 bit_2.0_Bug_13.png
Severity/Importance:	2-Major
Error Type:	Functional

Description

Steps to reproduce:

1. Open Kimba 2 application.

2. Open a folder with pictures by clicking 'file' module and select 'folder' option.

3. Select an picture.

4. Click on Edit then click on optimize.

5. Try to move the sharpness slider from the optimize window.

6. Pay attention to the result.

Actual result: The sharpness slider is disabled when the optimize window is opened. Please see [Windows11\\_64 bit\\_2.0\\_Bug\\_13.png](#)

**Expected result:** The sharpness slider should be moveable when the optimize window is opened as per the requirements. Please see [Windows11\\_64 bit\\_2.0\\_Bug\\_13\\_Requirement.png](#)

**Additional Information:** This same thing is happened for Brightness and Contrast slider.
